HISTORY OF PRESSURE HYDROMETALLURGY

| | |
|--|----|
| The Origins of Pressure Hydrometallurgy | 3 |
| <i>F. Habashi</i> | |
| Fifty Years of Pressure Hydrometallurgy at Fort Saskatchewan | 21 |
| <i>M.E. Chalkley, P. Cordingley, G. Freeman, J. Budac, R. Krentz and H. Scheie</i> | |
| Alcan Bayer Process Experimental Centre | 43 |
| <i>G. Forté and R. Girard</i> | |

PRESSURE HYDROMETALLURGY OF COPPER

| | |
|---|-----|
| Testing and Modelling a Novel Iron Control Concept in a Two-stage Ferric Leach/Pressure Oxidation Process for the Sepon Copper Project | 57 |
| <i>K.G. Baxter, D.G. Dixon and A.G. Pavlides</i> | |
| Concentrate Leach Plant Startup, Operation and Optimization at the Phelps Dodge Bagdad Mine in Arizona | 77 |
| <i>J.C. Wilmot, R.J. Smith and R.E. Brewer</i> | |
| Copper Concentrate Pressure Leaching Studies at Anglo American Chile | 91 |
| <i>G. Zárate and G. Tapia</i> | |
| The Effect of Surfactants on the Behaviour of Sulphur in the Oxidation of Chalcopyrite at Medium Temperature | 101 |
| <i>J.D.T. Steyl</i> | |

| | |
|--|-----|
| Hydrogen Reduction of Copper (I) Oxide in an Autoclave | 119 |
| <i>E. Jääskeläinen, O. Hyvärinen and M. Hämäläinen</i> | |
| Hydrometallurgical Processing of Telfer Concentrates: Accepting and Winning the Challenge | 127 |
| <i>D. Lunt, J. Canterford, T. Giraud, R. Dunne, D. Mitchell and D. Dreisinger</i> | |
| Hydrogen Reduction of Copper and Nickel in the Processing of Copper Bleed Solution of Indian Sea Nodules | 139 |
| <i>V. Kumar, B.D. Pandey, D. Bagchi and Premchand</i> | |
| LATERITES | |
| The Western Australian Nickel Laterites Projects - What Have We Learned? | 155 |
| <i>R.W. Nice</i> | |
| Effect of Process Water and Leach Temperature on the Leaching Behaviour | 181 |
| of New Caledonian Nickel Laterite Ores <i>M. Buarzaiga and M. Laframboise</i> | |
| Effect of Ammonium, Sodium and Potassium Sulphates and Chlorides in | 199 |
| the Pressure Acid Leaching of Western Australian Nickel Laterite Ore <i>J.A. Johnson and B.I. Whittington</i> | |
| Chromium Removal from Leach Liquors Produced during High Pressure | 215 |
| Acid Leaching of Nickel Laterite Ores <i>M. Buarzaiga and D. Marshall</i> | |
| Murrin Murrin CCD1 Rake Mechanism Modification: The Decision and the Result | 227 |
| <i>B. Hewitt and J. Belke</i> | |
| Kinetics of High Pressure Leaching of Nickel Lateritic Ores | 247 |
| <i>S. Stopić, B. Friedrich and N. Anastasijević</i> | |
| Process Development Studies Carried Out by Dynatec as Part of the | 259 |
| Ambatovy Nickel Project Evaluation <i>M.J. Collins, L.A. Barta, K.R. Buban, R. Kalanchey, G. Owusu, R. Raudsepp, J. Stikma and I. Masters</i> | |

PRESSURE HYDROMETALLURGY OF NICKEL SULPHIDES

Flammability of Ammonia Leach Solution Vapours under an Atmosphere of279
Enriched Oxygen

J. Budac, M. Sjogren, D. Belton and R. Kofluk

Investigation of Method for Addition of Surfactant to the Pressure Leaching295
of Nickel Containing Pyrrhotite Concentrates

A.V. Tarasov and E.M. Timoshenko

Development of an Effective Process for Pressure Disintegration of305
Sulphur-Sulphide Concentrates in the Hydrometallurgical Treatment of
Nickel Pyrrhotite Materials

M.N. Naftal and S.S. Naboichenko

AUTOCLAVE DESIGN

Oxidation Autoclave Agitation Review321
H.J.H. Pieterse

Measurement of Oxygen Transfer Rate with an EKATO Gassing Agitator339
in a 5 m³ Pressure Vessel

J. Ji and J. King

Design and Materials Selection of Autoclaves and Auxiliary Equipment351
R. Clary, J. Gulyas and P. Cheung

Quality Assurance Programs for Fabrication of Specialised Vessels and385
Exotic Alloy Piping

W. Bristowe, A. Hanson and M. Pearson

Advantages of Bottom Entry Oxygen Introduction for Pressure Oxidation401
D. Adams and J. Lammers

Slurry Dispersion Angle at Choke Outlet in Pressure Letdown with409
Multi-phase Flows

C.C. Smith, H. Pieterse, M. Luque, J. Robison and S. Chipman

Increasing the Capacity of Existing Exothermic Autoclave Circuits425
G.M. Dunn and H.W. Scriba

Special Design Considerations for Pressure Hydrometallurgy Pilot Plants445
P. Martin

Self-cleaning Fluidized Bed Slurry Heat Exchangers: Processing of459

Laterite Ore Slurries for the Extraction of Nickel and Cobalt in
High-pressure-acid-leach (HPAL) Plants
D.G. Klaren, E.F. de Boer and B. Crossley

PRESSURE HYDROMETALLURGY OF PGMs

Development of a Process to Unlock Refractory Platinum Concentrates477
Prior to a Chloride-assisted Pressure Leaching Process
C.J. Ferron, C.A. Fleming, D. Dreisinger and P.T. O'Kane

Modification of the Stillwater Base Metals Refinery Process499
L. Newman, R. Wyrick and R. Berezowsky

A New Process for Treating Slimes after Copper and Nickel Electrorefining515
A.C. Ter-Oganesyants, N.N. Anisimova, G.P. Kotukhova and G.N. Dylko

HIGH TEMPERATURE MEASUREMENTS AND THERMODYNAMICS

Experimental Study of the Solubilities of Aluminum Oxy-hydroxy529
Phases to 300 °C
D.A. Palmer, P. Bénézech, D.J. Wesolowski and S. Hilic

Acid-Base Ionization and Metal Complexation Under Hydrothermal545
Conditions by UV-visible and Raman Spectroscopy
P.R. Tremaine, L.N. Trevani and W.W. Rudolph

In-situ pH Monitoring of High Concentration Acidified Geothermal561
Brines and Acidic Sulphate Solutions at Elevated Temperatures
*S.N. Lvov, X.Y. Zhou, Z.F. Zhou, S.M. Ulyanov, V.G. Papangelakis
and Z.D. Jankovic*

Ammonia Pressure Hydrometallurgy: Estimation of High Temperature577
Stability Constants for Metal Ammine Complexes
K. Osseo-Asare and S.W. Asihene

The Thermodynamics of Titanium Corrosion in Acidic Systems593
J. Vaughan and A. Alfantazi

| |
|--|
| Acidity estimation of Pressure Leach Solutions at High Temperatures603 by Conductivity <i>M. Huang and V.G. Papangelakis</i> |
|--|

MATERIALS OF CONSTRUCTION

| |
|--|
| Design Fundamentals for Hydrometallurgy Pressure Vessel Refractory617 Linings <i>A. Koning and P. Lauzon</i> |
|--|

| |
|---|
| A Comparison of Refractory Lined and Metal-clad Process Vessels for639 Specific Operating Conditions <i>L. Zunti and M. Pearson</i> |
|---|

| |
|--|
| Impact of Mortar Properties on the Integrity of an Autoclave Brick Lining651 System <i>G. Hudon, Y. Pépin and J-F. Turgeon</i> |
|--|

| |
|--|
| Ball Valves with Nanostructured Titanium Oxide Coatings for High-pressure663 Acid-leach service: Development to Application <i>J. Williams, G.E. Kim and J. Walker</i> |
|--|

| |
|--|
| Severe Service Ball Valve Design Analysis Utilizing a Modified683 Kepner-Tregoe Method <i>P. Lauzon, L. Mercer, M. Pearson and J. Irvine</i> |
|--|

| |
|--|
| Brick Linings in High Pressure Acid Leaching (HPAL) Vessels697 <i>H. Feldheiser</i> |
|--|

| |
|--|
| Reliable and Economic Use of Masonry Lining Technology for705 Hydrometallurgical Applications <i>R.J. Wakefield, R.E. Aliasso, T. Crandall, R.J. Storms and J. van der Merwe</i> |
|--|

PRESSURE HYDROMETALLURGY OF REFRACTORY GOLD

| |
|---|
| Reducing the Energy Consumption of the Barrick Goldstrike Autoclaves719 <i>S.P. Cashin, D. Kashuba and W. Esplin</i> |
|---|

High Temperature POX of Precious/Base Metal Concentrates from Newmont's735
Phoenix Project, Using Controlled Precipitation of Sulphate Species to
Enhance Silver Recovery

G.L. Simmons and J.C. Gathje

Safety Protocols for Campbell Mine Autoclave Shutdowns751
M. Timmins

Pilot Plant Evaluation of a Hybrid Biological Leaching-pressure Oxidation765
Process for Auriferous Arsenopyrite/Pyrite Feedstocks
I. Dymov, C.J. Ferron and W. Phillips

Process Modifications to the São Bento Concentrator of Eldorado Gold781
L. Silva, R. Guimarães and J. Milbourne

PROCESS DEVELOPMENT STUDIES

Hydrothermal Synthesis of Functional Inorganic Materials from Aluminium795
Recycling Wastes
J. Shibata, N. Murayama and H. Yamamoto

Production of Thorium Concentrate from Egyptian Monazite807
A.M. Abdel-Rehim

Pressure Acid Leaching of Non-ferrous Smelter Slags for the Recovery823
of Their Base Metal Values
W. Curlook, V.G. Papangelakis and M. Baghalha

Features of High-temperature Oxidation of Non-ferrous Metal Sulphides839
and Pyrite in Acidic Sulphate Solutions Under Oxygen Pressure
S.S. Naboichenko and K.N. Bolatbaev

Applications of NSC Pressure Leaching855
C.G. Anderson

Interactions of Ferriferous Copper-nickel Mattes with Sulphuric Acid:887
Study of Chemistry and Kinetics
M.I. Kalashnikova, Y.M. Shneerson and M.V. Keskinova

Recovery of Europium and Yttrium from Spent Fluorescent Lamps899
M.A. Rabah

PRESSURE HYDROMETALLURGY OF ZINC

| | |
|--|--|
| Experiences with Zinc Pressure Leaching of 100% Red Dog Zinc Concentrate913 at Teck Cominco's Trail Operations <i>C.A. D'Odorico</i> | |
| Commercialization of the Dynatec Zinc Pressure Leach Process at Kazakhmys929 Corporation in Balkhash, Kazakhstan <i>S. Sadykov, R. Kalanchey, E. McConaghy, J. Stikma, K. Buban, and J. Ofstie</i> | |
| Autoclave Application for Zinc Leach Residue Treatment by Akita949 Zinc Co. Ltd. <i>H. Arima and Y. Kudo</i> | |
| The Hematite Process - New Concepts for Increased Throughput and Clean965 Hematite Production <i>T.C. Cheng and G.P. Demopoulos</i> | |
| Mathematical Modeling of Pressure Leaching of Sulphide Zinc Concentrate983 <i>Y.M. Shneerson, E.M. Vigdorichik, E.E. Zhmarin, A.Y. Lapin and V.M. Shpaer</i> | |
| Author Index.....999 | |
