

Table of Contents

VOLUME II:

CHLORIDE METALLURGY 2002, PRACTICE AND THEORY OF CHLORIDE/METAL INTERACTION

TITANIUM

The Austpac ERMS and EARS Processes for the Manufacture of High-grade Synthetic Rutile by the Hydrochloric Acid Leaching of Ilmenite

E.A. Walpole and J.D. Winter

The Altair TiO₂ Pigment Process and its Extension into the Field of Nanomaterials

D. Verhulst, B. Sabacky, T. Spitler and W. Duyvesteyn

High Temperature Chlorination to Produce Rutile

W.E. Dunn

Upgrading of Titania Slags by Selective Chlorination in Molten Salts

L. Freitas and M. Guéguin

Application of the Mechanism of Ilmenite Leaching in Hydrochloric Acid to the Production of Synthetic Rutile

J.P. van Dyk

Mechanism of the Chlorination of Metallic Oxides in the Presence of Carbon

D.M. Pasquevich

SOLVENT EXTRACTION

Extraction of Copper(II) from Chloride Systems with Individual and Mixed Extractants

J. Szymanowski and G. Kyuchoukov

Recovery of High Purity Iron(III), Titanium(IV) and Vanadium(V) from Waste Chloride Liquors from the Titanium Minerals Processing Industry by Solvent Extraction

M.L.P. Reddy and J. Saji

Copper Recovery from Hydrochloric Acid Solutions by Solvent Extraction with Acorga PT5050 in a Germanium Beneficiation Process

M. Mwema, M. Mpoyo and C. Kahandi

CALCIUM

Anodic and Cathodic Reactions in Molten Calcium Chloride

D.J. Fray

Corrosion Inhibition of Calcium Chloride

S.K. Mishra, J.S. McKennis and N.S. Bae

Calcium Sulphate Solubilities in Concentrated Aqueous Chloride Solutions

Z. Li and G.P. Demopoulos

COPPER AND ZINC

Intec Base Metal Processes Realising the Potential of Chloride Hydrometallurgy

J. Moyes and F. Houllis

Study of Hydrochloric Acid use in Heap Leaching Operations

F. Letowski, J. Czarny and B. Jasinski

Outokumpu HydroCopper™ Process - A Novel Concept in Copper Production

O. Hyvärinen, M. Hämäläinen and R. Leimala

Possibilities of Zinc Electrowinning from Molten Chloride Salts

*S.C. Lans, A. van Sandwijk, M.A. Reuter, J. Vandenhoute
and E. Robert*

Past, Present and Future of the EZINEX® Process

M. Olper and M. Maccagni

PYROHYDROLYSIS AND ENERGY RECOVERY

Comparison of Spray Roasting and Fluidised Bed Granulation for the Recovery of Hydrochloric Acid from Metallurgical Processes through Pyrohydrolysis

W. Steinbach and F. Baerhold

Energy Recovery in the Metal Chloride Pyrohydrolysers

K. Adham and C. Lee

Removal of Organotin Compounds from a Chloride Medium by Production of Tin Oxide

M.E. Kock, R. Ruitenbergh and C.T. Knaap

Pyrohydrolysis of an Al-Fe-Mg-Cl Solution – Characterisation of the Transformation Process

C. Coscia and J.A. Kozinski

Pyrohydrolysis of a Calcium and Magnesium Bearing FeCl₂ Leach Liquor

M.-C. Patoine, A. De Mori, K. Borowiec and C. Coscia

Development of Fluidised Bed Pyrohydrolysis Processes for Iron and Nickel Chloride Solutions

E.C. Eccleston and S.A. Bunk

FUNDAMENTALS, IRON CONTROL AND RECYCLING

A Contribution to the Study of Iron Removal from Chloride Leach Solutions

D. Filippou and Y. Choi

Metal Recovery from Electronic Scrap by Leaching and Electrowinning

N.P. Brandon, G.H. Kelsall, R. Olijve, M. Schmidt and Q. Yin

Basic Principles of Chloride Hydrometallurgy

D.M. Muir
